

Checklist preparing CMR

Calves

Follow the the preparing instructions to get the most out of your De Heus CMR

No	Description	
1	Always use clean equipment.	
2	Check the CMR feeding instruction table for the right amount of CMR solution to be prepared.	
3	Weigh the correct amount of CMR powder and add water to reach the required amount of CMR. Always weigh 150 grams of CMR powder per liter of CMR, and add water to make the right amount of CMR.	
4	Warm up the water to 45-50 °C, ensure never to exceed 70 °C. Use a thermometer.	
5	Mix thoroughly until the CMR powder is fully dissolved.	
6	Ensure the feeding temperature of the CMR is 41 °C by using the De Heus thermometer.	
7	Clean buckets and teat buckets carefully after each use.
