

Checklist preparing Nurse Meal

Piglets

Nurse Meal is a premium, highly nutritious product for the youngest piglets. Homogeneous mixing and clean conditions are essential, with water quality and temperature being key.

Follow these preparation instructions:

No	Description	
1	Take 1,5 liter of water, keep 750 ml for the next feeding in a clean and sealable bottle or bucket.	
2	Mix 750 ml of hot water with 750 ml water from previous feeding.	
3	Dose 500 ml of powder on top 1,5 liter of mixed water (55°C).	
4	Mix powder and water for at least 2 minutes. Let it soak for 20 minutes and then mix it again for 2 minutes.	
5	Close bags after usage, store dry and in the shadow.
