

# Feed Management Tips

## PIGS

1

- Always use fresh feed
- Feed multiple times per day

2

- Always have water available
- Animals should have access to water 24/7

3

- Always check the quality of your feed and the raw materials (Look, taste and smell)

4

- When switching feeds, mix adjacent feeds together for a couple of days

5

- Store the bags of feed, concentrate and raw materials in a clean and dry place

6

- Make sure the feed is not too coarse

7

- For optimal digestion a fine feed is better

8

- Take care for gut health, some fiber is needed
